**Drafter Estimator (Req. #54136)**

**Primary Location:** Kingston, Ontario  
**Employee Type:** Regular, Full Time (Unionized)  
**Compensation Grade:** B3-A1  
**Union/Non:** This is a unionized position  
**Bargaining Unit/Local:** Unifor Local 38 Kingston Operations  
**Closing Date:** 25 March, 2021  
**Rate Classification:** $30.50-$36.39 per hour

*Posting provisions of the Collective Agreement will apply.*

The opportunities are abundant at Enbridge! As a Drafter Estimator, that includes putting your specific GIS skills to work and taking ownership of projects from start to finish while working in a strong and collaborative team environment. 

This role provides you with a fast paced and challenging experience within the construction division that acts as a foundation for future career opportunities at Enbridge.

Our ideal candidate has a strong technical foundation in CAD, MicroStation and GIS applications as well as the ability to multi-task, communicate efficiently, strong organizational skills, works well with internal and external clients and focuses on safety, project success and continuous learning.

**What you will do (Responsibilities):**

- Maintain the data in the corporate mapping system through the addition, deletion and modification of facility information using as-builds, field sketches and work orders.
- Prepare estimates for new business, replacement or reinforcement projects (mains, services, stations).
- Co-ordinate municipal, highway, railway and right-of-way processes including specific drawings as required to secure easement and consent to construct.
- Complete field work for cost estimates, permits, measurements, etc.
- Interact with internal departments as required (i.e. Distribution Planning, Utility Services, Lands, Construction & Growth etc.).
- Create standard and ad hoc plots, maps and work packages as required for general and specific district activities (i.e. leak, corrosion, depth of cover, class location).
- Update record management and filing systems with paper and/or digital information.
- Assist with improving data integrity in corporate information systems (i.e. CARS, GIS, Banner, etc.).
- Support for Utility Services/Construction during emergency situations (i.e. line breaks).

**Who you are (Qualifications):**

- College diploma or University degree in a technical/engineering program with a preference for: Architecture, Civil, Survey or Construction or have a minimum of five (5) years related work experience relevant to Mapping, Drafting, Planning and Estimating procedures/techniques.
- Previous experience and knowledge using AutoCAD.
- Ability to read and interpret detailed pipeline construction drawings.
- Ability to effectively communicate verbally and in writing, using technical terms with managers, team leads, contractors, municipal officers, field personnel and customers.
- Good organization skills with strong attention to detail.
- Current valid drivers' license and maintenance of a responsible driving record.

**The following would be an asset:**

- Knowledge of the natural gas facility maps, records, and pipeline materials is preferred.

**NOTE: As this position is within the Local Bargaining Unit identified above, please note that members will be given first consideration. We accept applications submitted via our online recruiting system only.**
